

## **Custom Business Solutions: Mid-Level C# Software Developer**

### **Who We Are**

Custom Business Solutions was founded in 1994 and has been successfully leveraging our technology solutions in restaurants and innovating the hospitality industry for over two decades. We help hospitality professionals build more efficient restaurants and bars and we need people like you to help make sure their business stays on track. Learn more about our POS solution. We are currently seeking a passionate Mid-Level C# Software Developer, and if that sounds like you, then we want to meet you.

### **What does a Mid-Level C# Software Developer Do?**

We are proud to be a successful technology asset within the restaurant industry. As a Mid-Level C# Software Developer, this position will work with various technologies to invent, design, and test products that support our customers and inspire our team. As a company, we value the work- but we are also people and believe that in order to do excellent work, we need to have an excellent team. In fact, the people who work here are a lot like our customers; dedicated and passionate about what they do.

- Use cutting-edge technology to develop software for the benefit of our company and customers.
- Be able to clearly and effectively communicate with team members and business partners.
- Work in all stages of mobile software development.
- Work with experienced team members to analyze, design, code and customize software that our customers are using

### **What we look for: Skills and Requirements**

#### **Technical**

- 5+ years of software development experience
- Strong knowledge of C#/.NET required
- Experience in building and consuming RESTful API with JSON payload
- Solid understanding of the HTTP protocol
- Experience with frontend layout, preferably in XAML

- Experience with MVVM pattern
- Bachelor degree in Computer Science or equivalent

### **Skills and Abilities**

- Excellent written and verbal communication skills; the ability to present, explain clearly and professionally.
- Work in an agile environment (Scrum and/or Kanban) with flexibility and responsiveness.
- Understanding and working knowledge of CI/CD
- Highly motivated and a self-starter, who can take direction and lead others
- Quality first mindset and attention to detail
- Ability to collaborate and contribute in brainstorming sessions
- A sense of humor, ability to work with others and a team player mentality

### **Nice to have**

- Xamarin development
- iOS or Android development
- Database, Entity Framework, and LINQ
- Test-driven development
- Backend development
- Mobile provisioning and App Store publishing
- GitHub account or portfolio showcasing successful projects
- Enjoys coffee
- Experience in the restaurant industry

### **Compensation & Benefits:**

- Competitive Salary
- Paid Vacation/Sick Time
- Company-paid Health Insurance
- Dental/Vision/Life Insurance Coverage
- 401(k)

### **Extras:**

- Birthday Cake Celebrations

- Corporate Outings
- Cookouts
- Customer-Sponsored Lunches
